

5 MINUTE A WEEK MAINTENANCE CHECKLIST

- ✓ Turn pump **OFF**
- ✓ Empty skimmer basket of debris
- ✓ Check pump basket to see if it needs cleaned
 - If it does, then shut BOTH shut-off valves, turn lid and pop off, clean basket out, put lid back on, open BOTH shut-off valves
- ✓ Turn pump **ON**
- ✓ Push down handle on filter and turn to **BACKWASH**. Let pump run until water in the sight glass runs clear.
- ✓ Push down and turn handle on filter to **RINSE**. Let pump run for 2 true seconds
- ✓ Push down and turn handle on filter to **FILTER**

Salt system:

- ✓ At **2800**, through a bag of salt in the pool and allow the salt to dissolve and pass through the system without checking your salt level until then. Usually takes at least 24 hours for the salt level to rise.
- ✓ **70%** on your dial all season until the temperature outside gets 90 degrees or above, then crank the dial up to **90%**. You can go back to **70%** once the temperature gets back in the 80s.
- ✓ Super-chlorinate after **EXCESSIVE** use of the pool. (partys)
